Hongrong, MAY 19TH, 1890. Some official statement with reference to the

Money Order defalcations has been looked for with considerable interest. The Hon. P. Ryers gave notice at the last meeting Legislative Council of his intention to ask a question on the subject at the next meeting and His Excellency at once stated that defalcations had taken place, be'd ever known. but he was at the time unable to give particulars. The case is undoubtedly a bad one, and its gravity, as affecting the Audit Office. but we do not know how much truth there is it is aggravated if it be true, as alleged, that the statement, that the steamer Celestial is attention was called to the unsatisfactory state of the accounts some years ago. At present, however, it does not lie with the last. The Celestial cleared for Batavia on Tuescommercial community to scoff too much at the ways of officialdom. Two wrongs do not make a right, nor yet three, but with a couple of big bank frauds fresh in our recollection and the fact that one of our most important public companies finds its accounts in such a condition of disorder that t is unable to lay a statement before the shareholders, the non-official section of the stock, community may not unnaturally feel somewhat more chary than usual of indulging in the presence to sue John Hunt on these calls, but Hunt on these calls, but Hunt on the same length of but; instead of the saving America, where the percentage drops to pay these calls and he was compelled to ask butta being "long" and "short" as heretofore woefully,—and this fact, I take it, is physical existence of very reprehensible carelessness both in Government departments and in mercantile establishments. Defalcations by a Government servant, however, do strike one as a matter of somewhat greater gravity than similar defalcations outside. The de partments are free from the stress of commercial life, no one connected with them is ever expected to be in a hurry and there is supposed to be a beautiful system of audit by which the smallest error of account must be brought to light, even though it require the expenditure of reams of foolscap and miles of red tape, That a Government servant should steal he has the opportunity is no more surprising than that any one else should do the same thing, but it is a rude shock to find that all the claborate arrangements to render such a thing impossible are useless and that a man can go on committing a of pessimists, who have of late never wearled in series of peculations extending over a num. holding that the trade of the islands would keep ber of years without ever being found out until it pleases bim to take leave and remove himself beyond the jurisdiction. Baradas, we learn, has been arrested in Manila, and his extracted in Manila, and his palse for a very good account of it faving the part early specially designed with a right for the best and latest pattlers. The form of the figure can be hit up to about 500 yards the adult Englishmen of 5 ft. 8 in. and well the adult in contacting for the figure at a linear state complete and the adult in contacting for the figure at a linear state of the state of the individual well the adult in contacting for the figure at a linear state of the figure at a linear state of the state of the state of the adult in contacting for the figure at a ber of years without ever being found out

ther it will be granted or not is a matter of some doubt, but in any case a very scarching investigation is required into the question why his peculations were not discovered before they had reached anything like the amount they did. A man with a salary of \$120 a month is not supposed to be entrusted with the custody of large sums for lengthened periods. The case as it affects BARRADAS personally is a matter of much less public importance than the lamentable to have rendered the commission of the crime impossible.

WE trust that the whole of the numerous companies which have been formed in teen months may turn out flourishing concerns, but at the same time it would not be very suprising if some of them came to grief. At a time like the pre- on and from to-day (Monday), the 19th instant sent, when additional calls are being advertised almost every week in one Company or the construction of the new pier. The old pier another, and when there is very little money had accommodation for two launches alongside to meet them, it is as well that the liability at the same time, but the new one has only soof shareholders, past as well as present, instead of the sides. The period of one year, during which the liability of past shareholders continues, runs, not from the date at which the shares were disposed of, but the date of the registration of the transfer. The transferor is deemed to remain a holder of the shares until the name of the transferee is entered in the register book-in-respect-thereof. One offect of the FOR COAST PORTS, Waters are packed custom of dealing in blank transfers therefore is that the person in whose name the shares stand in the Company's register remains legally subject to all the liabilities attaching to such shares even although he may have sold them years ago. The Ceylon Observer relates the following unpleasant experience of a burglar :- Burglaries a Moorman in Kollupittiya, The thicf had made a hole in the wall sufficient to introduce his hand. The Moorman quietly waited beside till the hand appeared inside, then down came a sharp chopper on it, severing all four fingers, which were left behind as a memento. The police have not been able to trace the burglar yet. He evidently bandaged up his fingers to prevent any trace of blood beyond a few yards.

The trade returns for the Philippine Islands for last year show large total increases over those for 1888. The figures for imports and exports stand respectively at 232 and 341 million dollars, the difference to the advantage of 1889 under these heads being 21 and 64 million. The results (says a Manila paper) gainesy the forecasts on the downward path. The fact that the im-

Only a month or two ago the discovery of a rich deposit of arthracite coal in the Ekaterinoslaw Government · was announced. Coming to Asia, there are rich stores of coals in the northern half of Asia Minor. The extent of the Turkish coal deposits can only be guessed at, for a geological survey of even the rudest kind has never yet been attempted in this part of the Sultan's dominions. But the area within which the mineral occurs must be very large, judging from the nature and lay of the country. The neighbouring State, Persia, is belived to possess sone 9,000 square miles of coalfields. Afghanistan is known to contain coa', and in Turkestan and Contral Asia the Russian Government has been officially notified of the discovery of coal deposits. India possesses deposite extending over an area of no less than \$5,000 square miles, and there is little doubt that similar seems of the mineral will be traced in Burmah. Going further east there are some very important coalfields in Japan. Already over 6,000 square miles of deposits have been discovered, and the seams are being actively worked. Surpassing in extent and v lue all other deposits in Asia are the coalfields of the Chinese Empire. They are estimated to cover upwards of 400,000 square miles, an area greater than that of all the remaining coal deposits of the Old World taken to-gether. The vast store of fuel heaped up in these seams has not even been touched as yet. With this alone to draw upon, the world would for ages have little reason to fear a coal famine, and when the other unworked areas of Europe and Asia are added to the 400,000 square miles available in the Dragon Empire, it is abundantly clear that the period within which the supplies of the Old World will be exhausted must be very remote indeed. The extent of the United States coalfields is tolerably well known; but they are far from being the richest and most valuable in the New World. It is not at all unlikely that deposits of the Canadian Dominion will prove quite as extensive and important as those of the Republic. British Columbia is one mass of coal, and Nova Scotia is developing its collieries. at a rate that hids fair to muke it the great coal the veins run from 17ft. to 2 ft. in thickness. PRONUNCIATION." Anglo-Chinese Dictionary, published at the Daily Press Office. Hongkong. For comprehensiveness and practical service this Work stands unrivalled. All the new words which the Chinese have of late years been compelled to coin to express the numerous objects in machinery, photography, telegraphy, and inscience generally, which the rapid advance of foreign relations has imposed upon them, are here given in extense. Each and every word is fully illustrated and explained, forming exercises for students of a most instructive nature. Both the Court and Panti pronunciations are given the accenta being carefully marked on the best principle hitherto attained. The typegraphy 2.553 Tone Register, Captain Williamson, will displays the success of an attempt to make the be despatched for VANCOUVER, B.C., VIA Chinese and English type correspond in the size NAGASAKI, INLAND SEA, KOBE, and
